

NDX Digital Dentures

ADVANCED TECHNOLOGY › FUNCTIONAL STRENGTH › EXCEPTIONAL AESTHETICS

Build Your Patients' Confidence

As the aging population drives demand for dentures, there is a growing need for efficiency and accuracy to increase patient acceptance. NDX's Digital Dentures are created using advanced technology and premium materials, helping patients get their dentures more quickly and freeing up chairtime for practices.

HIGHER PATIENT SATISFACTION

- Digital dentures provide retention and adaptation to anatomy for an accurate, more comfortable fit
- The digital denture process creates a permanent digital record to replace lost or damaged dentures

IMPROVED EFFICIENCY AND PROFITABILITY

- **Eliminate up to three chair appointments with a more efficient denture workflow**
- Increase your production and improve office efficiency by decreasing remakes

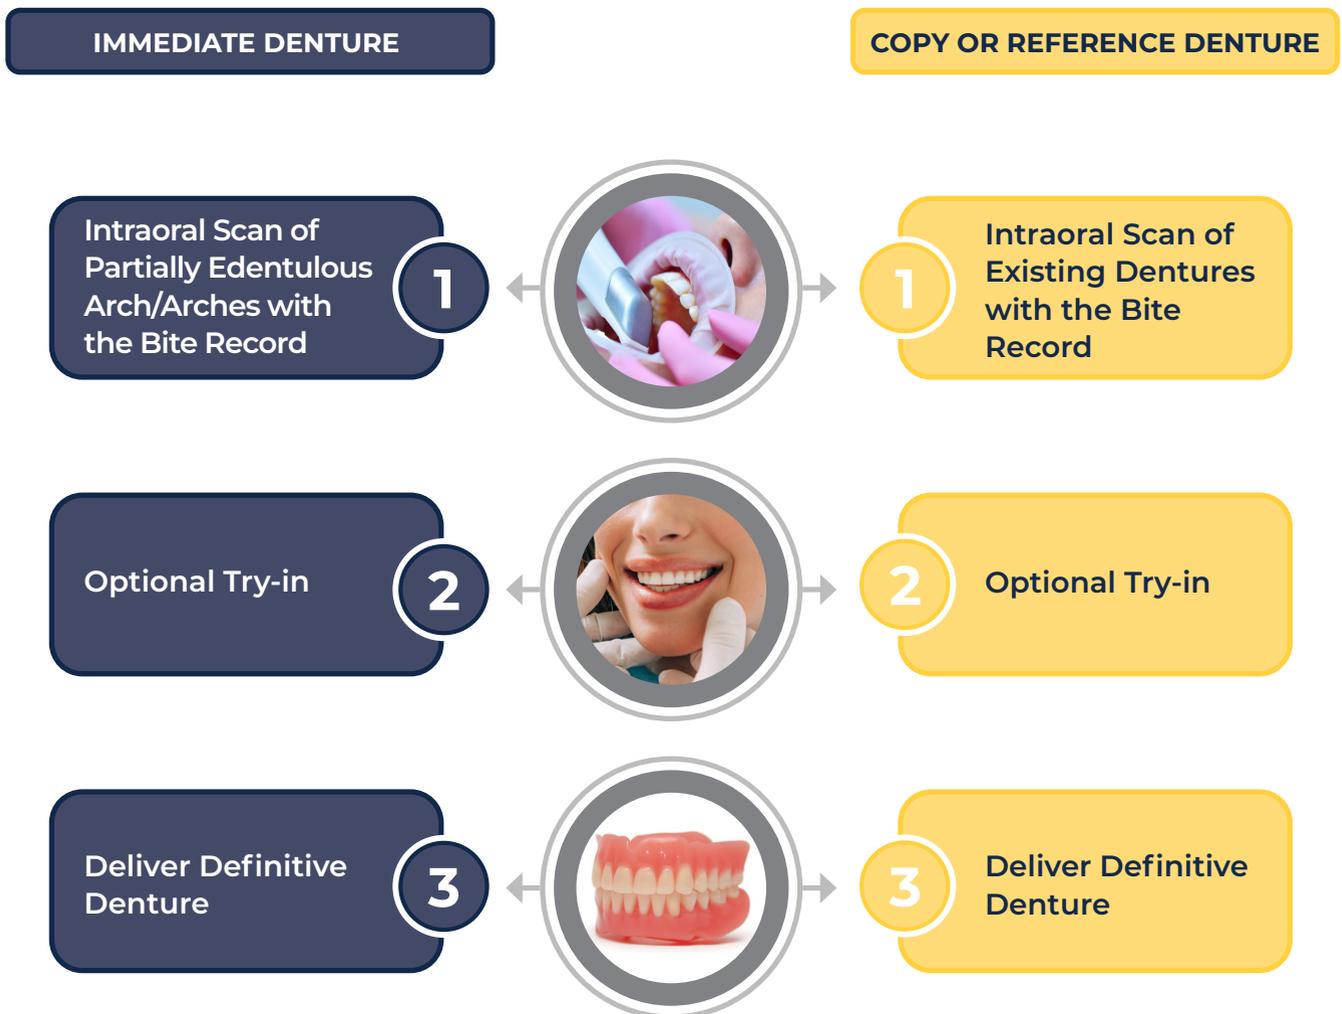

Three Appointments

NDX's Digital Denture Workflow provides seamless integration in three dental visits by utilizing existing techniques to fabricate a Copy Denture, Reference Denture or an Immediate Denture.

The digital workflow has the potential to be completed in just three chairside appointments by eliminating bite-rims and additional try-ins.

“ We now have the ability to reduce the amount of time before a patient can have their dentures. Most importantly for me has been the reliability and accuracy of the fit and aesthetics. ”

Dr. Luis Mariusso – Knoxville, Tennessee
